7. Problem				
Section 1.2: Paragraph 2 refers to "high level languages" for custom software. It is possible that many of the custom programs will use object oriented languages like C++, etc. C++ isn't what I would consider "high level".				
8. Recommendation				
Delete reference to "high level".				
<input type="checkbox"/> Hardcopy of Redlines/Comments Attached				
9. Impact if recommendation not implemented				
Although not in a requirement section, this statement in the overview leads the reader to conclude that only easily understandable (implied GOAL like) languages would be used for the custom software.

The requested action doesn't provide sufficient value added to warrant a change to the document. The RID is therefore rejected. Thank you for reviewing the SLS and submitting your RID. Even though we rejected this RID, your input is valuable and we appreciate it.
